GoFlex®
THUNDERBOLT™ ADAPTER

Seagate®

Perfect for when you need to:

- Upgrade your interface for faster file transfer performance
- Use Thunderbolt™ compatible peripherals

Upgrade your GoFlex® Ultra-Portable drive to increase performance.

Thunderbolt™ technology is a revolutionary interface supporting high-resolution display and high-performance data devices through a single port. At 10 Gbps, Thunderbolt™ technology is up to 20x faster than USB 2.0 and up to 12x faster than FireWire 800®. Transferring high-definition movies and other large files now can take seconds versus minutes when compared with older interface technologies.

As part of the GoFlex® ecosystem, the GoFlex® Thunderbolt™ portable adapter turns any GoFlex® portable drive into a blazing-fast Thunderbolt™ device for your computer. This portable solution allows you to take it with you everywhere you go, as it is completely bus powered, meaning you do not need an external power supply. Connect it to the end of a daisy chain of Thunderbolt™ devices, or directly to the Thunderbolt™ port on your computer.

With the help of Thunderbolt™ technology and compatible peripherals, users can turn their everyday computer into a powerful workstation.

Highlights

- Bus powered, no external power supply required
- 10 Gbps Thunderbolt™ port
- Compatible with Thunderbolt™ displays and other devices
- Works with any portable GoFlex® drive

GoFlex® drive sold separately
